VIRA PROCESS ENERGY (VPE)

Vira Process Energy (VPE) is an Engineering and Procurement Company as well as a trading house, active in electrical energy sectors.

Along with decades of domestic and international professional experience, we provide a wide range of total energy solutions and support our clients with supply of energy equipment and automation in Oil&Gas, Petrochemicals, Power Generation, Renewables, Transmission and Distribution, Utilities, Railway systems and other Industries as follows:

- Renewables: Full stand-alone solutions, solar panels, energy storage systems (ESS), solar and wind inverters (on/off grid), wind turbine-generators, charge regulators, battery chargers
- Industrial UPS, AVR, stabilizers, line-conditioners, power supplies, inverters, cathodic protection
- Power systems monitoring, recording and automation
- Power systems Wide Area Monitoring and Phasor Measurement (WAM, WAP, PMU)
- Substations protection, control and automation (P&C, SMS, SAS)
- Power generation: electrical balance of plant
- SCADA and communications
- Energy management and metering
- Field instrumentation
- Portable power stations

VPE benefits from a team of engineers, experts and managers coming from domestic and multi-national companies with a long history and valuable professional experience in electrical engineering and automation industries around the world.

VIRA PROCESS ENERGY (VPE) Services

VPE services include supply of equipment, engineering, test and commissioning, training and after sales services for electrical systems.

Engineering Solutions:

VPE Technical Division provides its clients with all technical requirements from design, supervision and project management to inspection, test, site commissioning and after-sales services.

Trainings and Educations:

Trainings and Educations section fulfills any required trainings or vocational educations. In addition to our scheduled classic trainings, our international partners support any customized trainings at our customers' premises.

Project Management:

Our professional project managers utilize their experience in management of small to large projects from start-up to hand-over phases in the right time, within the budget and with all standard qualities.

VIRA PROCESS ENERGY (VPE) Services

Procurement, Trading and Business Consultancy:

Our experts in Commercial Division serve procurement, trading, logistics, biddings and proposals, sales and after-sales as well as any required business consultancy tasks.

VPE utilizes its global network of partners from Europe to Asia to North America to Middle-East to supply the best electrical energy equipment and systems competitively and as quick as possible.

We are available to render any business consultancy services including drafting, preparation and negotiation of international contract agreements as well as planning, execution and closing of biddings, proposal, price analysis and tendering processes.

VIRA PROCESS ENERGY (VPE) Services

Partnership, Distributorship, After-sales services:

We have a long history of working with international suppliers and engineering companies around the world. Hitachi ABB, Siemens Energy, Honeywell, Fisher-Rosemount, ERL and Ecoflow are just a few to name.

Such global network has brought about strong partnership and mutual cooperation in terms of providing local solutions to meet our clients' requirements.

VPE also acts as agent or distributor of some manufacturers to fulfill supply of engineering products, spare parts and consumables.

Procurement of greenfield and brownfield projects is what our experts have rendered successfully for small and multi-million dollar projects.

VPE has the capacity and is interested in diversifying its businesses via expanding mutual cooperation with multi-national companies and international manufacturers world-wide.
